

Image

The package `tuda-pgfplots` provides color settings for `pgfplots` to use the Corporate Design colors of TU Darmstadt. It is part of the `tuda-ci` bundle.

Its usage requires knowledge of the `pgfplots` package, see the documentation using `texdoc` or via <https://ctan.org/tex-archive/graphics/pgf/contrib/pgfplots/>.

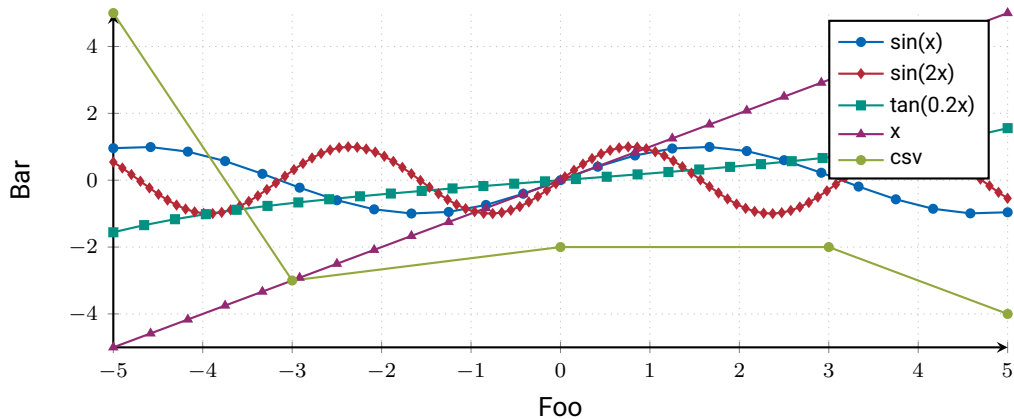

The rest of this document shows some easy examples of usage.

Bar charts: tudabarplot

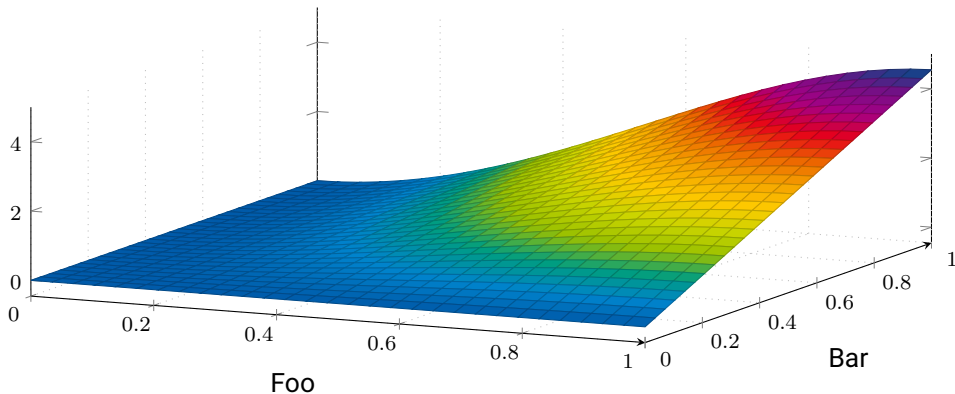

tudabarplot uses automatically the TU colors, e.g. \tud1a, \tud1b, from the corporate guide,
https://www.tu-darmstadt.de/media/medien_stabsstelle_km/services/medien_cd/das_bild_der_tu_darmstadt.pdf
